Eco-Web Ecological Consulting Ltd. is a progressive and growing company offering environmental services to the oil and gas industry in northeastern British Columbia. Eco-Web specializes in environmental impact assessments, fish and wildlife research, wildlife mitigation planning, environmental monitoring, reclamation (farm land to alpine habitats) and emergency spill response. Eco-Web is looking to add to our team and is seeking experienced, hard working, self-motivated, people with a drive to succeed and further their careers on dynamic and exciting projects. The following positions are currently available:

- **Senior Wildlife Biologist** – demonstrated experience in project management of large scale environmental assessments, wildlife management, fish and wildlife habitat assessments, fish and wildlife research, wildlife mitigation planning, environmental monitoring and stream crossings and restoration. Preference will be given to individuals with experience in the oil and gas industry and having a minimum of 10 years experience and a bachelor's or master's degree in a related field. Registered Professional Biologist standing or ability to obtain is considered a requirement.
- **Intermediate Wildlife Biologist** - experienced in wildlife management, fish and wildlife habitat assessments, fish and wildlife research, wildlife mitigation planning, environmental monitoring of large scale projects, stream crossings and restoration and environmental impact assessments, with a minimum of 6 years experience and a bachelor's degree in a related field. Registered Professional Biologist standing or ability to obtain is considered a benefit.
- **Senior Reclamation Specialist** – experience in soil and vegetation assessments, Schedule A and B Assessments to fulfill ALC requirements, topsoil stripping and replacement, erosion control, slope stability techniques, heavy equipment supervision, wellsite and pipeline construction knowledge and a good understanding of the Contaminated Sites Regulation and how it applies to the Certificate of Restoration process in BC. The ideal candidate will have a minimum of 6-8 years experience, a Bachelors of Science degree and membership as a P.Ag. with the BCIA.
- **Emergency Spill Response Specialist** – an individual with experience in emergency spill response, particularly geared to the oil and gas industry, on land, water and dealing with the logistical as well as regulatory aspects of spill response and clean up. A good understanding of the BC Contaminated Sites Regulation standards and guidelines, from sample design to reporting would be an asset. The ideal candidate will be a self-starter, able to manage people and projects, have a minimum of 4-5 years experience and either technical training or a Bachelor of Science degree.
- **Summer Student** – for the summer months, Eco-Web is looking at hiring hard working, energetic people, with an enthusiasm to learn and grow their skills in the environmental field. Preference will be given to individuals pursuing a career in the environmental sciences and the opportunity to return each summer during your schooling is strongly encouraged. If you are looking to expand your knowledge of the oil and gas environmental field and make some much needed money for your schooling, please send us a resume.

Compensation is dependant on experience but will be more than competitive. Please e-mail resumes to Dan Webster at dwebster@eco-web.ca or fax to 250-787-1175. For more information on our company please visit our web-site at: www.eco-web.ca
